## **DETAILED ACTION**

### ***Response to Amendment***

1. This is in response to an amendment/response filed on July 17<sup>th</sup>, 2008.
2. Claim 5 has been amended.
3. Claims 9-12 were previously cancelled.
4. Claim 13 has been added.
5. Claims 1-8 and 13 are currently pending.
6. Applicant's arguments with respect to claims 1-8 and 13 have been considered but are moot in view of rejection under 35 U.S.C. 101.

### ***Claim Rejections - 35 USC § 101***

6. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

7. Claims 1-8 and 13 are rejected under 35 U.S.C. 101 because the invention is not implemented on a specific apparatus and merely manipulates an abstract idea and solves a purely mathematical problem without any limitation to a practical application. It is noted "a system" is recited in the preamble and the body of the claim, however, the steps do not expressly involve the system which is not required to perform the steps and therefore the system is not a positive limitation of the claim and merely expressed in a statement of intended use. Accordingly, the claims fail to recite any structural tie to another statutory class of invention and therefore do not satisfy the threshold tie to be

eligible for patent protection under 35 U.S.C. 101. See IN RE BERNARD L. BILSKI, ET AL. Appeal No. 2007-1130 (Fed Cir. 2008).

### ***Response to Arguments***

8. Claims 5-8 were previously rejected under 35 U.S.C. 103(a) as being unpatentable over Levy et al. (U.S. Patent Application Publication 2003/0233445). It is noted with appreciation that the applicant has amended the claims to overcome the rejection. In response, the rejection has been withdrawn.
